Professional Summary

Full-stack web developer skilled in React.js, Node.js, Express.js, and PostgreSQL with experience building scalable web applications and REST APIs. Currently developing **Cravzo**, a subscription-based food delivery platform with vendor dashboards, transparent pricing, and real-world deployment experience. Passionate about backend engineering, scalable systems, and startup-focused product development.

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering 2022 – 2026
Greater Noida College, AKTU, India

Technical Skills

- **Languages:** Java, JavaScript, SQL
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js
- **Database:** PostgreSQL
- **Tools:** Git, GitHub, Postman, VS Code, Cloudinary
- **Concepts:** REST APIs, Authentication, Responsive Design, API Integration, Deployment

Projects

Cravzo – Subscription-Based Food Delivery Platform 2025 – Present

Tech Stack: React.js, Node.js, Express.js, PostgreSQL

- Developed and deployed a full-stack food delivery platform using a subscription-based business model to reduce restaurant commission costs.
- Built vendor dashboards for menu management, item availability tracking, and order handling workflows.
- Designed scalable REST APIs and integrated PostgreSQL database for user authentication, restaurant management, and order processing.
- Implemented responsive frontend UI using React.js with optimized API communication and reusable components.
- Integrated Cloudinary for image storage and optimization to improve website performance and loading speed.
- Configured production deployment, custom domain setup, and backend hosting for live application access.
- Collaborated with a 4-member team while leading product planning and technical development.
- Live Website: <https://cravzo.shop>

Quick AI – AI Productivity Web Application 2025 – Present

Tech Stack: React.js, Node.js, PostgreSQL

- Developing a full-stack AI-powered web application for image generation, article writing, blog generation, background removal, and object removal.
- Built frontend interfaces and backend APIs for handling AI-based user requests and content workflows.
- Integrated Clerk authentication system for secure user management and access control.
- Used Neon PostgreSQL database and Postman for API testing and backend workflow validation.

Experience

Backend and Web Development Intern – CodSoft

2025

- Worked on backend development and web application projects involving API integration and frontend-backend communication.
- Collaborated on debugging, feature implementation, and improving application workflows.
- Applied software engineering principles, version control practices, and problem-solving techniques in project development.

Certifications

- JavaScript Programming – 8-Week Program
- Java Full Stack Development – 6-Week Program
- Tata Crucible 2025

Relevant Coursework

- Data Structures and Algorithms
- Database Management Systems
- Operating Systems
- Object-Oriented Programming
- Computer Networks

Leadership & Achievements

- Led a 4-member development team in building and pitching Cravzo, a startup-focused food delivery platform.
- Managed full-stack development workflows including frontend, backend, deployment, and production debugging.
